2. To follow the MidWest Regional Meeting regarding the OAAA slides, the analytic team response is:

In looking at the OAAA reports, there's a slight difference in rounding between the 4-year rates in the tables vs. the line charts. The table values are rounded to the nearest tenth (i.e., 4.6%), while the 4-year lines are rounded to the nearest percent (i.e., 5%). I'll adjust that in future reports to avoid any confusion!
